Family Physiotherapy Centre (FPC) Launches new website!

Ottawa, Ontario

FPC is very pleased to announce that after 4 months of production/revisions and design that our new website is now **LIVE!**

We would like to extend a sincere word of Thanks to **Pixel84 Design Studio / Creative Web Development Solutions** www.pixel84.com for all of their hard work and for putting up with our numerous requests for modifications. A special Thank You to Horia Lambrache (Pixel 84 President) for often times making himself available into the early morning hours whenever he was asked to fit his schedule into ours.

The new website was designed to be an information/education portal and we believe that this has been achieved.

Easy to navigate with dedicated sections such as “**of interest**” and our **YouTube channel** <http://www.youtube.com/FamilyPhysiotherapy> now affords us the ability to keep every visitor informed of current events, Wellness promotions, education workshops etc..

“This new website is very user friendly, short on sizzle yet heavy on substance” noted Steve Brown PT President of Family Physiotherapy Centres.
